Asthma Mitigation Project
Funded Partners Round 2
August 2021

The Asthma Mitigation Project is funded by the California Department of Health Care Services (DHCS) and managed by The Center at Sierra Health Foundation.

The Center, in partnership with DHCS, awarded $1.85 million to six nonprofit organizations, community-based health care providers, health departments, and managed care organizations to provide culturally and linguistically appropriate asthma home visiting services to individuals with poorly controlled asthma, with a focus on low-income communities and communities of color who have disproportionate rates of asthma. Below are the awardees.

Asian Pacific Self-Development and Residential Association
San Joaquin County
$350,000
To improve asthma outcomes and build power for health equity and systems change through asthma home visitation, education, and environmental mitigation, utilizing a community health worker model.

International Rescue Committee
Stanislaus, Merced, Mariposa and Madera Counties
$350,000
To improve asthma outcomes through education, outreach, assessment, asthma home visitation, and remediation for underserved refugee and immigrant populations in the Central Valley.

Jakara Movement
Sutter County
$150,000
To improve asthma outcomes by providing education and outreach through asthma home visitation and environmental remediation, while expanding the Community Health Workers network.

Nexus Youth and Family Services
Amador and Calaveras Counties
$350,000
To improve asthma outcomes and asthma self-management through asthma home visitation, education, and environmental remediation for those with poorly controlled asthma.

McKinleyville Community Collaborative
Humboldt County
$300,000
To improve health outcomes for people living with asthma and reduce hospital visits related to asthma through asthma home visits, education, and environmental remediation, with a specific focus on Native American populations.

Somali Family Service of San Diego
San Diego County
$350,000
To improve home conditions and reduce emergency care visits by providing culturally and linguistically appropriate asthma home visits, education, and environmental remediation to East African and Middle Eastern refugees.
